### Summary

I'm Syed Ahsan Ullah, a Frontend Developer currently building my skills in React.js and Tailwind CSS. I am looking for an internship opportunity where I can apply my knowledge to real-world projects.

I have a strong foundation in building responsive user interfaces and I am comfortable working with modern CSS frameworks. As a beginner, I am highly motivated, a fast learner, and I am looking to grow my technical skills within a professional development team.

### Featured Projects

#### ByteBuy E-Commerce Platform

Full-featured e-commerce web application with modern shopping cart functionality, user authentication, and payment integration.

- Built with React.js, Tailwind CSS, Firebase (Authentication, Firestore, Storage), and Stripe payment gateway
- Implemented Zustand for global state management with localStorage persistence across sessions
- Developed shopping cart system with quantity controls, favorites/wishlist, and real-time price calculations
- Integrated Firebase Authentication for user management and Firestore for order tracking and history
- Created dynamic category filtering, product search, pagination, and responsive design for all devices
- Integrated Stripe payment API for secure checkout and order processing workflow

**Duration:** The development of the ByteBuy website took approximately a week to complete.

Live project: <https://mybankingwebapp.vercel.app/>  
github :<https://github.com/syedahsanullah-dev/BankingWebApp-main>

#### ProBank - Banking Web Application

Feature-rich banking application demonstrating Object-Oriented Programming principles with real-time transaction management and user authentication.

- Developed using Vanilla JavaScript (OOP approach), HTML5, and Tailwind CSS with MockAPI for backend
- Implemented core banking features: deposit, withdraw, money transfer with real-time balance updates
- Created comprehensive user authentication system with session management and form validation
- Built city-based offers system with subscription management and bonus reward calculations
- Designed modular class structure (User, Transaction, BankingSystem, Validator) following SOLID principles
- Integrated REST API operations with async/await patterns for data persistence and error handling

**Duration:** The development of the ProBank website took approximately a 3 days to complete.
